DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 4-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement and the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claim(s) also contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. New claim 4 recites "a stop sensing sensor configured to detect whether the automobile stops based on output signals from the first and second proximity switches". The original disclosure fails to support this limitation. Specifically, it is not clear how the stop sensing sensor can detect whether the vehicle stops based on the proximity switches. Instead, the system appears to detect the stop via the speed sensor and then selects a particular control mode based on the switches.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/523,433 Page 3

Art Unit: 3683

Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites "wherein, when the stop sensing sensor determines that the automobile stops and the second proximity sensor determines that the brake pedal is stepped on or when the automobile is on a status of key-off and the second proximity sensor determines that the brake pedal is stepped on, the solenoid check valve is configured to control the flow of oil between the master cylinder and the wheel cylinder so as to allow the oil to flow only from the master cylinder to the wheel cylinder, generating a brake effect." It is not clear what is required when the recited conditions are met. Note the claim recites "the solenoid check valve is configured". It is not clear if there is an active step of configuring (actuating), or if the limitation is directed towards the valve's design. Also note that the meaning of recitations are not clear as the functions appear to be dependent on the unrecited selection switch (the stop sensing sensor itself does not appear to be capable of the recited function).

Response to Arguments

Applicant's arguments filed 11/26/2007 are moot in view of the new grounds of rejection.

Conclusion

Application/Control Number: 10/523,433 Page 4

Art Unit: 3683

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley T. King whose telephone number is (571) 272-7117. The examiner can normally be reached on 11:00-7:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Siconolfi can be reached on (571) 272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
